Profile

I'm a passionate learner, currently building my skills in Data Structures and Algorithms (DSA) and MERN Stack Development. I love solving problems and creating user-friendly designs that make technology more accessible. With a strong curiosity and a drive to improve, I'm excited to take on challenges that help me grow while contributing meaningful solutions.

Education

Bachelor of Technology in Computer Science and Engineering,   2022 – Present
Ajay Kumar Garg Engineering College Ghaziabad   Ghaziabad

Class XII (ISC), *Assembly Of God Church School*   2020 – 2021
Percentage: 93.4%   Rupaidiha

Class X, *BrightLand High School*   2019 – 2020
Percentage: 91.25%   Nepalgunj, Nepal

Technical Skills

Languages
C/C++, HTML, CSS, Java Script, React.js, Redux, Node.js, Next.js

Frameworks/Libraries
React.js, React Router, Redux Toolkit, Express.js

Developers Tools
Git, GitHub, VS Code, Netlify, Vercel, Postman

Databases
MongoDB, SQL

Projects

Study Notion, *HTML, CSS, JavaScript, React, Node.js, Express.js, MongoDB*
Designed and developed a full-stack EdTech platform where learners can explore courses, enroll, and track their progress through an intuitive interface.
Built secure user authentication, integrated REST APIs for real-time course updates, and implemented efficient backend services to ensure smooth performance.
Deployed on Vercel for fast, reliable global access.
Source Code: GitHub ⧉   Live Site: Site ⧉

Merchant Aisle, *HTML, CSS, JS, REACT, REACT ROUTER*
I built a two-page e-commerce website using React.js and Redux, fetching product data dynamically from REST APIs to create a seamless, responsive user experience.
Source Code: GitHub ⧉   Live Site: Site ⧉

Spotify Clone, *HTML, CSS, JS*
Replicated core Spotify functionality including playback and playlist creation.
Source Code: GitHub ⧉
